Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance:

Interpreting the claim in light of the specification, examiner finds the claimed invention is patentably distinct from the prior art of record. The prior arts do not expressly teach or render obvious the invention as recited in independent claims 1 and 7.

Sugaiwa et al. (Publication No. US 20180267530 A1) discloses

An automated driving system includes at least one electronic control unit configured to: recognize at least one obstacles around a vehicle, based on ambient surroundings of the vehicle; create a traveling

plan of the vehicle, based on the ambient surroundings and a result of recognition of the at least one obstacles; control the vehicle using an actuator installed on the vehicle, based on the traveling plan; and perform, according to input from a user of the vehicle, overwriting operation to change the result of recognition of the at least one obstacles used for creation of the traveling plan.

Kentley et al. (Publication No. US 20170126810 A1) discloses Various embodiments relate generally to autonomous vehicles and associated mechanical, electrical and electronic hardware, computer software and systems, and wired and wireless network communications to provide an autonomous vehicle fleet as a service. In particular, a method may include identifying a location of a user device associated with a user, transmitting a command to an autonomous vehicle system associated with an autonomous vehicle service to transit to the location, and providing information associated with the user device to the autonomous vehicle system, where the information includes configuration data to adapt one or more sub-systems of the autonomous vehicle. Sub-systems of the autonomous vehicle may include interior lighting, ambient sound, road handling, seating configuration, communication synchronization, and temperature control systems.

Jaygarl et al. (Publication No. US 20200286477 A1) discloses a method for processing plan is provided. The method includes multiple end points including obtaining an intent corresponding to a user utterance, generating the plan for setting a connection order of actions for executing the intent, determining whether there are multiple end points of the actions, determining whether the actions having different end points are independent, and combining actions having the same end points to generate a plurality of sub plans again and then processing the plurality of sub plans in parallel when the actions having the different end points are independent.

The features "the automation description includes an operation impact that specifies limits on utilization of network communication resources of the vehicle; generate a notification and discontinue the automated action plan when the limits on the utilization of network communication resources have been exceeded," when taken in the context of claims 1 and 7 as a whole, were not uncovered in the prior art of teachings.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
