The examination is being carried out on the **following application documents**

Description, Pages

195 as published

Claims, Numbers

1-15 filed with entry into the regional phase before the EPO

Drawings, Sheets

1/70 as published

Reference is made to the following documents; the numbering will be adhered to in the rest of the procedure.

D1 US 2018/076970 A1 (HAN JEONG SEOK [KR] ET AL) 15 March 2018 (2018-03-15)

D2 US 2019/079842 A1 (CHAE JUN BYUNG [KR] ET AL) 14 March 2019 (2019-03-14)

D3 DE 10 2006 023137 A1 (SIEMENS AG [DE]) 22 November 2007 (2007-11-22)

D4 US 2019/207862 A1 (KAJIO KAZUHIRO [JP] ET AL) 4 July 2019 (2019-07-04)

D5 HERBER CHRISTIAN ET AL: "Real-time capable CAN to AVB ethernet gateway using frame aggregation and scheduling", 2015 DESIGN, AUTOMATION & TEST IN EUROPE CONFERENCE & EXHIBITION (DATE), EDAA, 9 March 2015 (2015-03-09), pages 61-66, XP032765862, DOI: 10.7873/DATE.2015.0266 [retrieved on 2015-04-22]

1 The amended claims 7 and 11-15 fulfill the requirements of Article 123(2) EPC.

2 Claims 1-15 are unclear and do not fulfil the requirements of Article 84 for the following reasons: The expression "converged network device" does not have a clear definition other than that has the functionality of connecting two different

kinds of networks with each other to make if possible for their nodes to communicate. This is also the interpretation given to the term for the purpose of this communication.

3 With regard to present claim 1 the document D1 discloses a system comprising:
a vehicle having a first network and a second network (paragraph 0002);
a first device on the first network (paragraph 0016); and
a converged network device interposed between the first network and the second network and structured to facilitate communications between the first device and the second network (paragraph 0020);
wherein the first network is of a different type than the second network (paragraph 0020).

Hence claim 1 does not fulfill the requirements of Article 54(1) EPC since its subject matter is not novel.

4 The above objection regarding novelty of claim 1 could also have been raised based on any of the documents D2-D4.

5 The additional subject matter of claim 2 is known from paragraph 0020 of D1. The additional subject matter of claim 3 is rendered obvious by D1, since this is a necessary feature. The additional subject matter of claims 4-6 is known from paragraph 0016. The additional subject matter of claim 7 is known from paragraph 0060 with figure 1. The additional subject matter of claim 8 is known from paragraph 0016 of D1. The additional subject matter of claims 9 and 10 are the result of normal design considerations that do not give any contribution to an inventive step. The additional subject matter of claim 11 is defining how it is decided how a node is allowed to be communicated with, this functionality is known from for example paragraph 0008 of D1. The exact implementation used (a vehicle data definition circuit for instance) is however knot known from the prior art on fille. There is however no indication that it would anything else than the result of normal design considerations. Regarding claims 12 and 13 they are the result of normal design considerations that do not give any contribution to an inventive step. Claims 14 and 15 only define the use of a third network. This is known from figure 1 of D1.

6 The independent claims are not in the two-part form, which in the present case would be appropriate, with those features known from the prior art being placed in the preamble and with the remaining features being included in the characterising part (Rule 43(b) EPC).

7 To meet the requirements of Rule 42(b) EPC, the documents D1-D5 should have been identified in the description and the relevant background art disclosed therein should have been briefly discussed.

8 The features of the claims should have been provided with reference signs placed in parentheses to increase the intelligibility of the claims (Rule 43(7) EPC). This applies to both the preamble and characterising portion.

9 When filing amended claims the applicant should at the same time bring the description into conformity with the amended claims. Care should be taken during revision, especially of the introductory portion and any statements of problem or advantage, not to add subject-matter which extends beyond the content of the application as originally filed (Article 123(2) EPC).

10 In order to facilitate the examination of the conformity of the amended application with the requirements of Article 123(2) EPC, the applicant is requested to clearly identify the amendments carried out, irrespective of whether they concern amendments by addition, replacement or deletion, and to indicate the passages of the application as filed on which these amendments are based.

If the applicant regards it as appropriate these indications could be submitted in handwritten form on a copy of the relevant parts of the application as filed.
