INVITATION TO PAY ADDITIONAL FEES

International application No.

PCT/EP2022/061593

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-22(partially)

   Determination of a marker panel comprising PCT, a cardiac troponin and bilirubin for assessing a subject with suspected infection.

   ---

2. claims: 1-22(partially)

   Determination of a marker panel comprising PCT, a cardiac troponin and Aspartate aminotransferase and/or Alanine aminotransferase for assessing a subject with suspected infection.

   ---

3. claims: 1-22(partially)

   Determination of a marker panel comprising PCT, a cardiac troponin and haptoglobin for assessing a subject with suspected infection.

   ---

4. claims: 1-22(partially)

   Determination of a marker panel comprising PCT, a cardiac troponin and ESM-1 for assessing a subject with suspected infection.

   ---

5. claims: 1-22(partially)

   Determination of a marker panel comprising PCT, a cardiac troponin and Creatinine for assessing a subject with suspected infection.

   ---

6. claims: 1-22(partially)

   Determination of a marker panel comprising PCT and creatinine for assessing a subject with suspected infection.

   ---

7. claims: 1, 3-9, 11-13, 15(all partially)

   Determination of a marker panel comprising PCT and a BNP-type peptide for assessing a subject with suspected infection.

   ---

8. claims: 1-22(partially)

Determination of a marker panel comprising PCT and sTREM1 for assessing a subject with suspected infection.

---

9. claims: 1, 3-10, 12, 15, 17, 19, 21, 22(all partially)

Determination of a marker panel comprising PCT and ESM-1 for assessing a subject with suspected infection.

---

10. claims: 1, 3-10, 12, 15, 17, 19, 21, 22(all partially)

Determination of a marker panel comprising PCT and haptoglobin for assessing a subject with suspected infection.

---

11. claims: 1, 3-10, 12, 15, 17, 19, 21, 22(all partially)

Determination of a marker panel comprising PCT and Heparin Binding Protein (HBP) for assessing a subject with suspected infection.

---

12. claims: 1, 3-10, 12, 15, 17, 19, 21, 22(all partially)

Determination of a marker panel comprising PCT and Aspartate aminotransferase for assessing a subject with suspected infection.

The reasons for which the application is not considered to comply with the requirements of unity of invention are specified in the annexed provisional opinion accompanying the partial search results (EPO Form 1707).
The application relates to a plurality of inventions, or groups of inventions, in the sense of Article 82 EPC. They have been divided as defined above. If the applicant pays additional fees for one (or more) not yet searched group(s) of invention(s), then the further search(es) may reveal further prior art that gives evidence of a further lack of unity 'a posteriori' within one (or more) of the not yet searched group(s). In such a case only the first invention in this (each of these) group(s) of inventions, which is considered to lack unity of invention, will be the subject of a search. No further invitation to pay further additional fees will be issued. This is because Rule 64(1) EPC stipulates that the European search report shall be drawn up for the parts of the application relating to inventions in respect of which search fees have been paid. In such a case the non-searched claims may be filed as divisional applications.

Annex to Form PCT/ISA/206
COMMUNICATION RELATING TO THE RESULTS OF THE PARTIAL INTERNATIONAL SEARCH

International Application No
PCT/EP2022/061593

1.The present communication is an Annex to the invitation to pay additional fees (Form PCT/ISA/206). It shows the results of the international search established on the parts of the international application which relate to the invention first mentioned in claims Nos.:
see 'Invitation to pay additional fees'.

2.This communication is not the international search report which will be established according to Article 18 and Rule 43.

3.If the applicant does not pay any additional search fees, the information appearing in this communication will be considered as the result of the international search and will be included as such in the international search report.

4.If the applicant pays additional fees, the international search report will contain both the information appearing in this communication and the results of the international search on other parts of the international application for which such fees will have been paid.

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category °	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	MINA HUR ET AL: "Diagnostic and prognostic utilities of multimarkers approach using procalcitonin, B-type natriuretic peptide, and neutrophil gelatinase-associated lipocalin in critically ill patients with suspected sepsis", BMC INFECTIONS DISEASES, BIOMED CENTRAL, LONDON, GB, vol. 14, no. 1, 24 April 2014 (2014-04-24) , page 224, XP021184432, ISSN: 1471-2334, DOI: 10.1186/1471-2334-14-224 abstract; p.7, co. 1; p. 7, par.: "Conclusions" -----	1-22

[X] Further documents are listed in the continuation of box C.

[X] Patent family members are listed in annex.

° Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance;; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance;; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family
