FI/F-TERMS:

KEYWORDS OR OTHER ELEMENTS FEATURING THE INVENTION:
Positioning and stabilizing structure for providing force to hold seal forming structure, in which the at least one gas delivery tube is impermeable to air and is made of two pions (a patient-contacting portion and a non-patient contacting portion) joined by at least one seam, wherein this at least one seam comprises rigidising elements embedded within or layered on the seam to provide rigidity to the gas delivery tube.
