Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The present application, filed on or after March 16, 2013, is being examined under the first inventor to file provisions of the AIA.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/23/2025 has been entered.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 01/12/2026 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Allowable Subject Matter

Claims 1-13 would be allowable.

Regarding claim 1, prior art Kaehler et al. as modified by Mattioliet et al., Sawa et al., and Procemax Oy disclose a computer implemented method and further teach

obtaining a previously captured image data of a virtual tour of a location, receiving real-time image data of a target object located within a field of view area of a camera, which target object is located in a same location wherein the previously captured image data was captured, analyzing the real-time image data for detecting a deviation, overlaying the real-time image data of the target object on a corresponding area of the target object in a virtual tour view for forming a mixed image virtual tour data, only if the deviation is detected, otherwise the virtual tour view of the target object is shown, receiving real-time acoustic data captured by an audio sensor in the location, analyzing the received acoustic data for detecting a malfunction, and playing the real-time acoustic data in an area of the mixed image virtual tour view corresponding to the location of the audio sensor or its surroundings in the location if the malfunction is detected for further augmenting the mixed image virtual tour by real-time acoustic data. But the prior art or combination thereof fails to disclose or make obvious the claimed invention as a whole, about "wherein the method further comprises: continuously overlaying real-time image data of a first target object on a corresponding area of the virtual tour view irrespective of detecting a deviation; and overlaying real-time image data of a second target object on a corresponding area of the virtual tour view only upon detecting a deviation in analysis of image data of the second target object, the overlay being presented as a pop-up image". Claims 2-8 and 13, each ultimately depend from claim 1, and are therefore allowed at least due to their respective dependencies from the allowable claim 1.

Regarding claim 9, prior art Kaehler et al. as modified by Mattioliet et al., Sawa et al., and Procemax Oy disclose a camera system and further teach at least one camera

and a data processing unit, wherein the data processing unit is configured to obtain a previously captured image data of a virtual tour of a location, and which the at least one camera is configured to capture real-time image data of a target object located within a field of view area of the at least one camera, and which target object is located in the same location wherein the previously captured image data was captured; and wherein the data processing unit is further configured to analyze the real-time image data for detecting a deviation and overlay the real-time image data of the target object on a corresponding area of a virtual tour view for forming a mixed image virtual tour, only if the deviation is detected, otherwise the virtual tour view of the target object is shown, and which the system further comprises an audio sensor configured to capture acoustic data in the location and to transmit the captured acoustic data to the data processing unit for analysis, wherein if a malfunction is detected, the real-time acoustic data is configured to be played in an area of the mixed image virtual tour view corresponding to the location of the audio sensor or its surroundings in a real environment. But the prior art or combination thereof fails to disclose or make obvious the claimed invention as a whole, about " wherein the data processing unit is further configured to: continuously overlay real-time image data of a first target object on a corresponding area of the virtual tour view irrespective of detecting a deviation; and overlay real-time image data of a second target object on a corresponding area of the virtual tour view only upon detecting a deviation in analysis of image data of the second target object, the overlay being presented as a pop-up image". Claims 10-12, each ultimately depend from claim 9, and are therefore allowed at least due to their respective dependencies from the allowable claim 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
