CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons

& : member of the same patent family, corresponding document

CLAIMS INCURRING FEES

The present European patent application comprised at the time of filing claims for which payment was due.

☐ Only part of the claims have been paid within the prescribed time limit. The present European search report has been drawn up for those claims for which no payment was due and for those claims for which claims fees have been paid, namely claim(s):

☐ No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for those claims for which no payment was due.

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

see sheet B

☐ All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.

☐ As all searchable claims could be searched without effort justifying an additional fee, the Search Division did not invite payment of any additional fee.

☐ Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid, namely claims:

☒ None of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims, namely claims:

1-12 (partially)

☐ The present supplementary European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims (Rule 164 (1) EPC).

LACK OF UNITY OF INVENTION
SHEET B

Application Number
EP 22 16 5219

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

1. claims: 1-12(partially)

compositions and methods for diagnosing an allergy comprising a polypeptide as defined in (E1) and (E2) belonging to immunoglobulin M heavy chain secretory form

---

2. claims: 1-12(partially)

compositions and methods for diagnosing an allergy comprising a polypeptide as defined in (E3), (E4), (E5), (E6), (E7) and (E8) belonging to ?-1 metal binding globulin

---

3. claims: 1-12(partially)

compositions and methods for diagnosing an allergy comprising a polypeptide as defined in (E9) and (E10) belonging to lactoperoxidase

---

4. claims: 1-12(partially)

compositions and methods for diagnosing an allergy comprising a polypeptide as defined in (E11) and (E12) belonging to polymeric immunoglobulin receptor

---

5. claims: 1-12(partially)

compositions and methods for diagnosing an allergy comprising a polypeptide as defined in (E13) belonging to C3-beta-c

---

6. claims: 1-12(partially)

compositions and methods for diagnosing an allergy comprising a polypeptide as defined in (E14) and (E15) belonging to Ig heavy chain precursor (B/MT.4A.17. H5. A5)

---

7. claims: 1-12(partially)

compositions and methods for diagnosing an allergy comprising a polypeptide as defined in (E16) and (E17) belonging to perilipin

---

8. claims: 1-12(partially)

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

compositions and methods for diagnosing an allergy comprising a polypeptide as defined in (E18) and (E19) belonging to zinc-alpha-2-glycoprotein

---

9. claims: 1-12(partially)

compositions and methods for diagnosing an allergy comprising a polypeptide as defined in (E20) and (E21) belonging to glycoprotein 2

---

10. claims: 1-12(partially)

compositions and methods for diagnosing an allergy comprising a polypeptide as defined in (E22) belonging to lactadherin

---

11. claims: 1-12(partially)

compositions and methods for diagnosing an allergy comprising a polypeptide as defined in (E23) belonging to immunoglobulin light chain, lambda gene cluster

---

12. claims: 1-12(partially)

compositions and methods for diagnosing an allergy comprising a polypeptide as defined in (E24) belonging to intracellular cholesterol transporter 2

---

13. claims: 1-12(partially)

compositions and methods for diagnosing an allergy comprising a polypeptide as defined in (E25) belonging to apolipoprotein A-IV

ANNEX TO THE EUROPEAN SEARCH REPORT ON EUROPEAN PATENT APPLICATION NO. EP 22 16 5219

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
