Legal file No. R22-681/2025

Indication of deficiencies in a request pursuant to Rule 22 EPC and invitation to correct them

Your request dated 14.03.2025 for entry of a change in the European Patent Register concerning the identity of the applicant/patent proprietor contains the following deficiencies:

The evidence submitted is found to be unsatisfactory as the application(s)/patent(s) that is/are the object of the transfer is/are not unambiguously identifiable.
- Evidence of the transfer of a patent application belonging to the same patent family is not regarded as satisfactory evidence of the transfer of the European patent application/patent concerned. The definition of the relation to the present European patent application is too vague in order to register the transfer of the present European patent application. Please file an evidence mentioning the European or international patent or application number.

You are hereby invited to remedy the deficiency(ies) within two months from notification of this communication. If the deficiency(ies) is/are not remedied within the specified time limit, the request for entry of a change must be rejected.

Under the UPR, the time limit for remedying the deficiency is not extendable. An extension can only be requested under Rule 132(2) EPC for the EPC contracting states not territorially covered by the unitary effect.

Important information
- The deficiency referred to in the present communication concerns applications/patents for which the EPO is still competent. A separate communication will be issued in cases where the EPO is no longer competent.
- Registration of the transfer for the EPC contracting states not territorially covered by the unitary effect is only possible during the opposition period or during opposition proceedings

Registered Letter

(see Rule 85 EPC).
- The time limit for remedying the deficiency is **two months** from notification of the present communication, provided the EPO is competent. If this is not the case (e.g. expiry of the opposition period), the time limit may be less than two months.
