31 October 2025

Dear Sir or Madam,

European Patent Application No. 21844898.3 - 1001
Optical die-last wafer-level fanout package with fiber attach capability
Advanced Micro Devices, Inc.
Our ref: JCH/130013EP1

With reference to the examination report dated 3 July 2025, we attach an amended set of claims 1 to 9 to replace the claims currently on file. A marked-up claim set is also attached.

Claim 1 has been amended to address the Article 123(2) EPC objection, in accordance with the Examiner's suggestion, which is appreciated by the Applicant.

The subject-matter of claims 7 and 8 has been combined to address section 2.3 of the report.

With reference to section 2.4 of the report, the Examiner has indicated that claims 7-10 should be deleted, which appears to contradict section 2.3. We note that claim 9 is dependent on claim 1 only, and is not dependent on claim 7. We also submit that the quoted portion of paragraph 0025, particularly when read in light of Figures 1A and 1B, indicates that SOC 105 and PIC 110 and PIC 115 are attached to an organic redistribution layer (RDL 140) with microbumps 145 secured by underfill 155, and it is the RDL 140 that is "on bumps 160 on substrate 135". This interpretation is consistent with Figures 1A and 1B, and this disclosure along with Figures 1A and 1B provides a direct and unambiguous disclosure for the configuration recited in claims 7-10.

VENNER SHIPLEY LLP IS A LIMITED LIABILITY PARTNERSHIP INCORPORATED PURSUANT TO THE LIMITED LIABILITY PARTNERSHIPS ACT 2000 REGISTERED IN ENGLAND AND WALES, REGISTERED NUMBER OC308202, AT 200 ALDERSGATE ST., LONDON EC1A 4HD. REGULATED BY IPREG.

We trust that the application is now in order for grant. However, if any objections do remain (e.g. relating to former claims 7-10), the Examiner is invited to contact the Representative by phone initially. As a precaution however, our provisional request for oral proceedings is maintained.

Yours faithfully,

//Electronically Signed//

Jonathan Hancox
Authorised Representative
